

Unlimited opportunities with top technology from Bosch

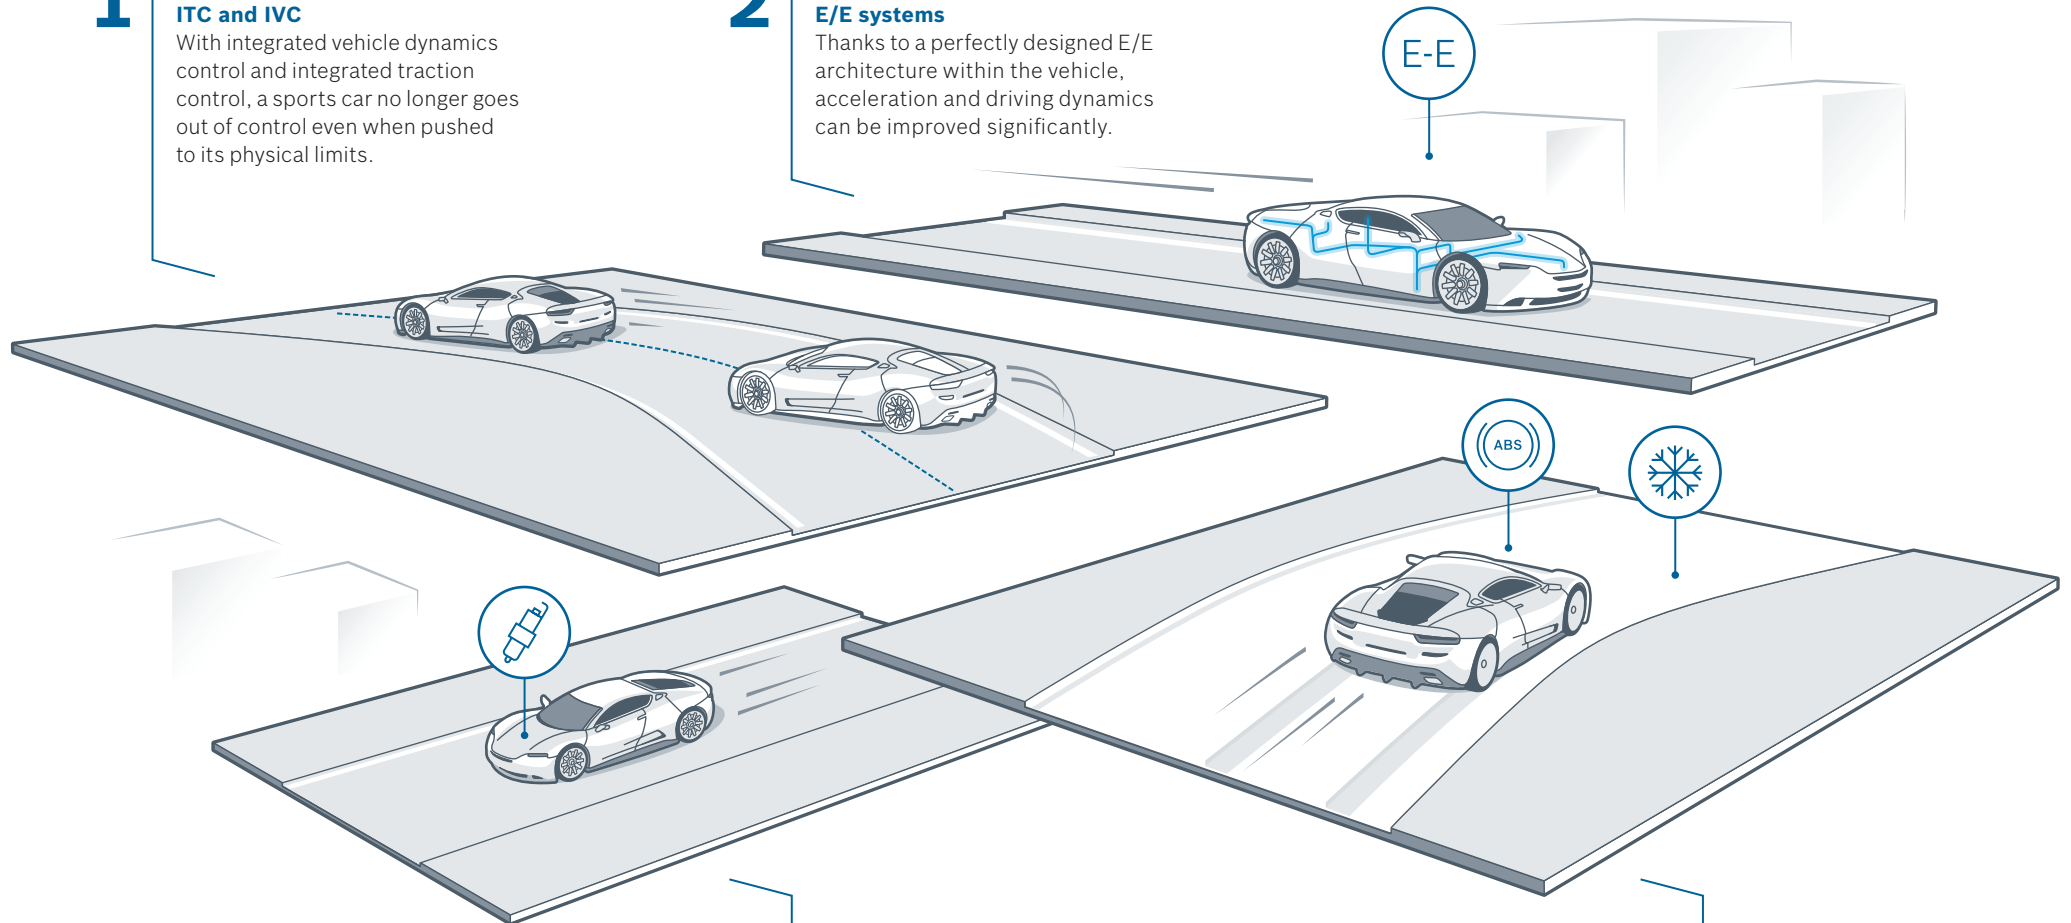

BOSCH
Technik fürs Leben

1 **Endless driving enjoyment: ITC and IVC**

With integrated vehicle dynamics control and integrated traction control, a sports car no longer goes out of control even when pushed to its physical limits.

2 **A network of peak performance: E/E systems**

Thanks to a perfectly designed E/E architecture within the vehicle, acceleration and driving dynamics can be improved significantly.

3 **A bit more is possible: gasoline direct injection**

In combination with engine downsizing, gasoline direct injection offers improved response behavior and more dynamic handling, thanks to the torque which is up to 50% higher in the lower speed range.

4 **Unlimited safety: ABS and ESP control**

ABS and ESP control from Bosch make it possible to maintain full control of a sports car even in critical situations.
